# Google Search App Campaign Installation

Google 検索アプリのキャンペーンで行った体験型インスタレーション。実際のアプリと同じ機能をイベント用にオリジナルのインターフェースで制作。渋谷の駅前で実施し、たくさんのユーザーに体験してもらえました。

This is an installation for Google Search app campaign. We made original interface for users to experience same function as Google Search app. It took place in front of Shibuya station and many users experienced this. I designed leaflet as well.

# Food Fighter

Food Fighter は、調理の楽しさを呼び起こす体感型インスタレーション。前方に設置された Kinect が体の動きを検知し、体験者の分身をスクリーンに投影。ハイスピードカメラで撮影した映像により、体の動きに合わせて、まるで映画のワンシーンのように食材がダイナミックに切れ/砕け、体験者の直感を刺激する。

Food Fighter is an installation that gives you an experience of fun cooking at TOKYO DESIGNERS WEEK 2011. You can chop foods with your movements like action scenes of films. The system is that foods shot with high-speed camera are cut or broken with a person's movement sensed by Kinect. It is exciting experience and appeals to everyone's instinct. A lot of visitors enjoyed it.

# Stage direction for gaka's gig

16人バンド画家主催のイベント”嬉しい音楽 VOL.1”でのライブ演出。過剰演出と題して、渋谷 WWW の正面に障子、天井・左右3面に布を貼ってスクリーンにし、会場全体を映像で包み込みました。画家の生演奏に合わせた障子プロジェクションマッピング+3面VJや、楽器にLEDを装着して発光させるなど、LIVEを過剰に演出しました。

I did stage effects for a gig event hosted by gaka on 2nd May. They were 3 effects mainly. 1:Vj toward ceiling, left and right walls to wrap the floor with moving images. 2: Projection mapping on Shoji, which is Japanese traditional door set up by my team, as a main screen. 3: LED attached to instruments emit to music by program.
